# Filer (Blue Side) Interface Functionality

## Combined “Existing Cases” and “My Cases” Pages

The latest eFlex Code has merged these two pages into a single page without loss of functionality.

## Enhanced Password Security

The upgrade improves the strength of passwords and does not allow a filer to reuse passwords.

## Prevent Password Encrypted Documents

This feature aims at preventing a user from uploading a .pdf document that is encrypted; eFlex cannot date and time stamp encrypted documents. Note: This feature may still mistakenly allow some encrypted documents to be uploaded, depending on the encryption type, but work on this is ongoing.
